

DigitalOcean's cloud solutions and their pricing:

1. Droplets:

- Basic Droplets: Start at \$4/month for 1 GB of RAM, 1 vCPU, 25GB SSD, and 1TB transfer.
- General Purpose Droplets: Start at \$63/ month for 8GB of RAM, 2 vCPUs, and 25GB SSD.
- CPU-Optimized Droplets: Start at \$47/month for 4GB of RAM, 2 vCPUs, and 25GB SSD 【13†source】 .

2. Kubernetes:

- Managed Kubernetes Clusters: Start at \$10/month for the control plane, plus the cost of the Droplets used in the cluster 【13†source】 .

3. Spaces (Object Storage):

- Pricing: Starts at \$5/month, which includes 250GB of storage and 1TB of outbound data transfer.
- Additional storage: \$0.02/GB per month.
- Extra outbound transfer: \$0.01/GB 【14†source】 .

4. App Platform:

- Starter Plan: Free for static websites.
- Basic Plan: Starts at \$5/month for apps with a shared CPU, auto-scaling, and HTTPS enabled.
- Pro Plan: Starts at \$12/month with more resources, auto-scaling, and advanced features 【13†source】 【14†source】 .

5. Managed Databases:

- Managed databases start at \$15/month for the smallest size, including automated backups, security features, and scaling.
- Available database engines include PostgreSQL, MySQL, and Redis 【14†source】 .

6. Volumes (Block Storage):

- Pricing: Volumes cost \$0.10/GB per month, allowing you to attach scalable block storage to your Droplets 【13†source】 【14†source】 .

****These services are designed for a range of cloud computing needs, from scalable web apps to storage and database management, with transparent and affordable pricing options.****
